COPROKNET

Coproknet is a unique collaboration between the University of Bayreuth and leading institutions worldwide. This research network is about developing innovative research and methods through knowledge co-production. This distinctive approach underpins our commitment to sustainable climate governance solutions. One of the network's core values is collaboration, uniting academic researchers, local communities, and stakeholders to confront the challenges of climate change. By fusing scientific research with indigenous knowledge and local experiences, Coproknet is forging sustainable solutions that fortify community resilience and adaptability in changing environmental conditions.
